SECTION 1: BACKGROUND INFORMATION 1

CHAPTER 1: THE IMPORTANCE OF CLEANING AND DISINFECTION 1

1.1 Legislation
1.2 HACCP and cleaning
1.3 Cost benefit

CHAPTER 2: MANAGEMENT RESPONSIBILITIES FOR CLEANING AND DISINFECTION

2.1 Management structure 5
2.1.1 Management responsibilities 5
2.1.2 How to choose your Hygiene Team 6
2.2 Hygiene Manager responsibilities 10
2.2.1 Selection and auditing of a suitable chemical supplier 10
2.2.2 Selection and management of sanitation chemicals, cleaning equipment and methodology 11
2.2.3 Defining the cleaning window 12
2.2.4 Development of cleaning schedules 12
2.2.5 Training of Hygiene Operatives 13
2.2.6 Employment of specific contractors 13
2.2.7 Implementation of sanitation programme monitoring and verification systems 13
2.2.8 Representation of hygiene issues to the Management Team 14
2.3 Hygiene Operatives 14
2.4 Health and safety 14
2.5 Environmental issues 16

CHAPTER 3: PROVISION OF SERVICES 18

3.1 Potable water 18
3.1.1 Drainage 20
3.2 Compressed air 20
3.3 Steam 21
3.4 Electricity 22
3.5 Hygienic design of the sanitation equipment 23
3.6 Sanitation chemicals 25
3.7 Cleaning rooms 28

Q CCFRA 2008

CHAPTER 4: THE BASIC PRINCIPLES 29

4.1 Components of the sanitation programme 29
4.2 Water quality 31
4.3 Programme stages 31
4.4 Hygienic design of food processing equipment 35

SECTION 2: SANITATION PROGRAMME DESIGN 38

CHAPTER 5: CHEMICALS REQUIRED AND THEIR SELECTION 38

5.1 Detergents 38
5.1.1 Types of detergent 38
5.1.2 Factors affecting choice 42
5.2 Sanitisers 46
5.3 Disinfectants 46
5.3.1 Chemical disinfectants 46
5.3.1.1 Types of chemical disinfectant 47
5.3.1.2 Factors affecting choice 48
5.3.1.3 Factors affecting efficacy 55
5.3.1.4 Disinfectant testing 57
5.3.2 Non-chemical disinfectants 57

CHAPTER 6: METHODS OF CLEANING AND DISINFECTION 61

6.1 Open plant cleaning 61
6.1.1. Dry cleaning 61
6.1.2 Wet cleaning 63
6.1.3 Automated systems 68
6.1.4 Clean-as-you-go techniques 69
6.2 Closed system cleaning 69
6.3 Novel methods 74
6.4 Cleaning and maintenance of the cleaning equipment 74

CHAPTER 7: FREQUENCY OF CLEANING AND DISINFECTION 76

7.1 Frequency assessment 76
7.2 Daily procedures 78
7.3 Periodic cleans 79
7.4 Infrequent cleans 80

CHAPTER 8: CLEANING AND DISINFECTION METHODS AND CHEMICAL CHOICE DECISION TREES 81

CHAPTER 9: CLEANING AND DISINFECTION SCHEDULES 85

9.1 Cleaning plan 86
9.2 Cleaning schedules 88
9.2.1 Whole room 88
9.2.2 In-production 90
9.2.3 End of production 90
9.2.4 Periodic 94
9.2.5 Site decontamination 95
9.3 Preparation of schedules 96
9.3.1 Issuing and reviewing 97

CHAPTER 10: SANITATION PROGRAMME VALIDATION AND TARGET SETTING 98

10.1 Visual cleanliness 98
10.2 Freedom from soiling 99
10.3 Freedom from micro-organisms 100
10.4 Target setting 100

SECTION 3: SANITATION PROGRAMME MANAGEMENT 104

CHAPTER 11: ASSESSMENT OF THE SANITATION PROGRAMME 104

11.1 Monitoring and verification 104
11.2 Design of a monitoring programme 104
11.2.1 Labour 104
11.2.2 Cleaning window 105
11.2.3 Cleaning methodology 105
11.2.4 Effectiveness of the cleaning 106
11.2.4.1 Visual 107
11.2.4.2 ATP 109
11.2.3.2 Protein detection 110

© CCFRA 2008

11.3 Design of a verification programme 111
11.3.1 Microbiological 111
11.3.2 Allergen 113
11.4 Trending results 113
11.5 Microbiological problem solving 115

CHAPTER 12: SANITATION PROGRAMME AUDITING 117

12.1 Internal audits 117
12.2 External audits 120

CHAPTER 13: TRAINING PROGRAMMES 122

13.1 Management Team 122
13.2 Hygiene Managers 123
13.3 Hygiene Operatives 123

CHAPTER 14: SANITATION PROGRAMME REVIEW 125

14.1 Revision process 125
14.1.1 Factors affecting the sanitation programme 125
14.2 Implementing the required changes 128
