

Your research partner of choice

We have lots of experience in securing funding from agencies such as Innovate UK and the EU

Perceived barriers

I don't want to contribute cash

I don't want to make the results public

Not a requirement - your input can be covered with staff time, materials, line time etc

Not a requirement - results are confidential to consortium

I don't know how to build the consortium

The application is too daunting

We do and can help

We can help with writing, we have been involved in >20 successful projects funded by Innovate UK

We can help you through the process:

- ✓ Identify funding sources
- ✓ Write proposals
- ✓ Build consortia
- ✓ Manage projects

Working with industry and academia on collaborative applied projects, we are also happy to partner with academics where an applied element to the work is required
