

Systems Change Thinking - Creating Value from Unavoidable Food Supply Chain Wastes

16 January 2018
Nottingham, UK

Further information and registration at <https://foodwaste-systemschange.eventbrite.com>

Unavoidable food supply chain waste is a treasure trove of unexploited, bio-based materials and chemicals, with a range of potential commercial applications.

This free event will be an excellent opportunity to listen to, and connect with, key industrialists, academics, consultants and policymakers who are exploring the chemical and environmental benefits of utilising this unique bioresource.
