PRESS RELEASE

Campden BRI to provide UK scientific analysis to HM Revenues and Customs

Campden BRI has been appointed to scientifically analyse imported goods by HM Revenue and Customs (HMRC) as part of a three-year contract. Campden BRI will carry out analysis of goods imported into the UK from outside the EU and draw on their extensive industry knowledge and expertise to provide specialist consultation services to HMRC. This extends Campden BRI's status as UK scientific analysts for HMRC, which it has held for the past 11 years.

Campden BRI will analyse both food and non-food products using a broad range of expertise and specialist equipment to detect nuances in the make up of a product. Some of the questions Campden BRI will be asked to investigate include: Is this lamb fat or lamb meat? Is this rice really brown rice? Has this food product labelled fresh been frozen? Is this wheat really Durum? The answers affect how a product is classified, which is crucial for the HMRC so it can apply the correct tax or duty. The work of Campden BRI will have significant financial implications and could ultimately lead to unsafe products being withdrawn and destroyed.

Some of the common items sent for analysis include tea, wood, tropical fruits, cakes and vodka, but Campden BRI has extensive facilities suitable for analysing a diverse range of products. More unusual items received previously include wetsuits and medical devices.

Campden BRI can also be called as an expert witness for HMRC during court proceedings, and using their detailed understanding of import requirements provide input and guidance on proposals to alter tax tariffs. Julian South, Head of Chemistry & Biochemistry at Campden BRI said:

"We are honoured to have been appointed UK scientific analysts by HMRC, a status which we have now held continuously for 11 years. This reflects both our investment in state of the art equipment and techniques to ensure our laboratories remain at the cutting edge and our commitment to continually

Campden BRI, Registered no. 510618, Incorporated in England & Wales
Registered Office: Station Road, Chipping Campden, Gloucestershire. GL55 6LD
Part of Campden BRI Group

developing and extending the expertise of our analysts and other scientists.”

Campden BRI (www.campdenbri.co.uk) provides technical, legislative and scientific support and research to the food and drinks industry worldwide – with a comprehensive “farm to fork” range of services covering agri-food production, analysis and testing, processing and manufacturing, safety, training and technical information services. Members and clients benefit from industry-leading facilities for analysis, product and process development, and sensory and consumer studies, which include a specialist brewing and wine division.

2. [Campden BRI](http://www.campdenbri.co.uk) specialises in the practical application of technical excellence to support the food and allied industries through analysis and testing, operational support, research and innovation, and knowledge management. It is the world's largest membership-based food research organisation, with nearly 400 staff based at its three sites: Chipping Campden (Headquarters), Nutfield (Surrey - brewing division), and Budapest (Hungary).
3. Its activities include assuring the safety of food and drinks, [food processing and manufacturing](#) support, [food analysis and testing](#), [training](#) and [publishing](#). Each year it hosts hundreds of business visits and trains around 6,000 people from food and drink companies worldwide. Further information on its activities can be found at www.campden.co.uk
4. Expertise at Campden BRI includes:
 - a. [manufacturing technologies](#) - food processing (heating, chilling, freezing), aseptic technology, [microwave heating](#), [malting and brewing](#), [milling](#), [baking](#) and extrusion technology, and process control and instrumentation, [packaging technology](#)
 - b. safety assurance - including [hygiene and sanitation](#), [microbiology](#) and preservation, processing technologies, analysis and testing (microbiological, chemical), and quality and safety management,
 - c. [product development](#) and quality, [consumer studies](#), market insights, [sensory science](#), [authenticity testing](#), shelf-life evaluation, labelling and [legislation](#)
 - d. [agri-food production](#), ingredients, raw materials, raw material technology,
 - e. underpinning science - [cereal science](#), [microbiology](#), [chemistry and biochemistry](#), molecular biology
5. Facilities at Campden BRI include:
 - a. 3,000 sq m of laboratories for food and drink microbiology, hygiene, chemistry, biochemistry, molecular biology, brewing and cereal science, and packaging technology

- b. 3,500 sq m food process hall and [pilot plant](#) including malting and brewing, retorting, chilling, milling, baking, hygiene and packaging
- c. 800 sq m of dedicated training and conference facilities
