Guideline No. 51

**Pasteurisation:
a food industry practical guide
(Second edition)**

J.E. Gaze

2006

Information emanating from this company is given after the exercise of all reasonable care and skill in its compilation, preparation and issue, but is provided without liability in its application and use.

It is the responsibility of the Guideline user to ensure that all appropriate risk, hazard and safety assessments with regard to the methods, equipment and reagents have been carried out prior to using the method and to ensure that procedures comply with relevant legislation.

Any mention of specific products, companies or trademarks is for illustrative purposes only and does not imply endorsement by CCFRA.

Legislation changes frequently. It is essential to confirm that legislation cited in this publication and current at the time of printing, is still in force before acting upon it.

The information contained in this publication must not be reproduced without permission from the Publications Manager.

CONTENTS

	Page No.
1. PRINCIPLES OF PASTEURISATION	1
Design of safe food pasteurisation treatments	3
Heat resistance data	6
Substrate protection effects	17
Worked examples of pasteurisation values	19
P values	23
Legislation considerations	27
2. MANUFACTURING OPERATIONS	35
pH recommendations	35
Hurdle technology	39
Water activity	39
Curing	39
Multi-component formats	40
Mixed particulates	41
Hot filling	41
Cooling after pasteurisation for ambient stored products	44
Pasteurised products stored chilled	44
Cooling of larger pasteurised products designed to be stored chilled	46
3. FOOD PRODUCTS - EXAMPLES OF TYPICAL HEAT TREATMENTS	48
4. VALIDATION OF PASTEURISATION PROCESSES	49
5. CONCLUDING COMMENTS	53
6. ACKNOWLEDGEMENTS	54
7. REFERENCES AND RELEVANT PUBLICATIONS	55
8. GLOSSARY	69
