	Page no.
1. INTRODUCTION	
1.1 Guidelines summary	2
2. TERMINOLOGY	8
3. PRODUCT DESCRIPTION	14
3.1 Foods	14
3.2 Culinary steam	14
4. SCHEDULED PROCESSES FOR FOOD PRODUCTS	16
4.1 Low-acid foods	16
4.2 Low-acid particles in acidic carrying liquids	16
4.3 Acidified low-acid foods	17
4.4 High-acid foods - below pH 4.5	17
4.5 Foods with low and intermediate values of a_w	17
4.6 Milk, milk based drinks, cream and ice cream	17
5. HEAT PROCESS DESCRIPTION	18
5.1 Flow diagram	18
5.2 Plant construction	20
5.3 Plant services	31
5.4 Control systems and functions	33
5.5 Plant operation	37
6. ASEPTIC FILLING AND PACKAGING	41
6.1 Packaging and materials of composition	41
6.2 Microbiological integrity	42
6.3 Microbiological decontamination methods	42
6.4 Aseptic filling systems	45
6.5 Packaging environmental control	48
6.6 Testing of packages	49
6.7 Coding	50

7.	SECONDARY PACKAGING AND PALLETISATION	51
7.1	Strength of secondary packaging	51
7.2	Stacking heights	51
7.3	Batch identification	51
8.	STORAGE REQUIREMENTS	52
8.1	Chemicals	52
8.2	Packaging materials	52
8.3	Food raw materials	53
8.4	Finished goods in storage and distribution	54
9.	PLANT ACCEPTANCE TRIALS	55
9.1	Establishment of a thermal process	55
9.2	Plant leak tests	57
9.3	Package material decontamination	58
9.4	Aseptic filling environment	59
9.5	Package integrity	59
9.6	Microbial aspects of commissioning and operation	60
9.7	Cleaning-in-place (C.I.P.)	62
10.	PLANT COMMISSIONING AND OPERATION	63
10.1	Personnel selection and training	63
10.2	Operations - manning	63
10.3	Personal hygiene	64
10.4	Health and safety at work	64
10.5	Plant records	64
10.6	Maintenance	65
10.7	System failure	65
10.8	Monitoring and control of critical factors	66
10.9	Product recall	67
11.	PRODUCTION TESTS	68
11.1	Correct installation and maintenance	68
11.2	Services - check	68
11.3	Materials - check	69
11.4	Pre-production plant checks	70

11.5	Control in pre-production plant sterilisation	71
11.6	Control in microbial decontamination of packaging	72
11.7	Control in thermal processing of food	73
11.8	Control over aseptic filling environment	74
11.9	Control over filling operations	75
11.10	Control over package integrity	76
11.11	Control during plant shutdown and C.I.P.	77
11.12	Control in storage and distribution	79
11.13	Examination of suspect spoiled containers	80
12.	HEAT PROCESS BEHAVIOUR	81
12.1	Flow characteristics	81
12.2	Microbial kinetics and process values	83
13.	REFERENCES	85
