

CONTENTS

CHAPTER 1 INTRODUCTION

| | |
|--------------------------|---|
| Introduction | 1 |
| Colour code for drawings | 4 |

CHAPTER 2 MATERIALS OF CONSTRUCTION

| | |
|--|----|
| Introduction | 5 |
| Stainless steels | 5 |
| 1. Types of stainless steels used in the food industry | 7 |
| (a) Martensitic, (b) Ferritic, (c) Austenitic | |
| 2. Surface finish | 8 |
| 3. Measurement of surface finish | 9 |
| 4. Surface finish of different forms of steels | 10 |
| (a) Sheets | 10 |
| (b) Tubes and fittings | 11 |
| (c) Castings | 11 |
| (d) Welds | 11 |
| 5. Corrosion of stainless steels | 12 |
| (a) Passivation | 12 |
| (b) General corrosion | 13 |
| (c) Pitting | 14 |
| (d) Crevice corrosion | 15 |
| (e) Stress corrosion cracking (SCC) | 17 |
| (f) Weld decay (intercrystalline corrosion) | 18 |
| Cast iron | 19 |
| Mild steel | 19 |
| Galvanised iron | 19 |
| Titanium | 19 |
| Aluminium | 20 |
| Copper and copper alloys | 20 |
| Glass | 20 |
| Rubber | 20 |
| Plastics | 21 |
| Wood | 21 |
| Photographs of stainless steel surfaces, welds and corrosion | 24 |
| Bibliography | 28 |

CHAPTER 3 INSTRUMENTATION

| | |
|-----------------------|----|
| Introduction | 30 |
| Temperature | |
| Screwed probes | 31 |
| Welded probes | 32 |
| Flow | |
| Electromagnetic | 34 |
| Turbine | 35 |
| Variable area | 36 |
| Direct mass | 37 |
| Positive displacement | 37 |
| Ultrasonic | 37 |
| Vortex shedding | 37 |
| Pressure | |
| Gauges | 38 |
| Transducers | 41 |

CHAPTER 4 STIRRERS AND AGITATORS

| | |
|---|----|
| Introduction | 42 |
| Shaft sealing - top entry | |
| Thrower | 42 |
| Lip seal | 43 |
| Double mechanical seal | 44 |
| Double lip seal | 45 |
| Open shaft support bearing | 46 |
| Enclosed shaft support bearing | 47 |
| Shaft sealing - side entry | |
| Single mechanical seal (flange mounted) | 48 |
| Single mechanical seal (tube mounted) | 49 |
| Shaft sealing - bottom entry | |
| Single mechanical seal | 50 |
| Double mechanical seal | 50 |
| Magnetic drive | 51 |
| Packed gland | 52 |
| Blade attachment | 53 |
| Shaft coupling | |
| Flange | 57 |
| Muff | 59 |
| Mounting arrangements | 60 |
| Foot bearings | 62 |
| In-line continuous mixer | 63 |
| In-line static mixer | 64 |

CHAPTER 5 PIPELINES

| | |
|---|-----|
| Introduction | 65 |
| Pipe materials | |
| Stainless steel | 65 |
| Plastic | 66 |
| Rigid plastic | 67 |
| Flexible plastic | 67 |
| Rubber | 67 |
| Glass | 68 |
| Connections | |
| Welding - stainless steel | 68 |
| Couplings - stainless steel | 68 |
| International Dairy Federation (IDF) Type | 69 |
| Clamp Type | 72 |
| Swedish Standard (SMS) | 74 |
| Danish Standard (DS) | 77 |
| German Standard (DIN) | 78 |
| British Standard Recessed Ring Joint Type (RJT) | 81 |
| U.S. 3-A Ground Seat Type | 83 |
| U.S. 3-A Gasket Type | 85 |
| Flanges | 86 |
| Rigid plastic | |
| Couplings | 88 |
| Full face flanges | 90 |
| Stub flanges | 92 |
| Rigid plastic/stainless steel | 95 |
| Flexible/stainless steel | 96 |
| Drainage | 99 |
| Pipe supports | 103 |
| Dead legs | 108 |
| Air pockets | 110 |
| Floor and wall openings | 111 |
| Insulation | 113 |
| Jacketing | 115 |
| Sight glasses | 116 |
| Sampling devices | 117 |

CHAPTER 6 VALVES

| | |
|----------------------|-----|
| Introduction | 119 |
| Plug | |
| Onloff | 120 |
| Diversion | 122 |
| Ball | 123 |
| Butterfly | |
| Single | 125 |
| Multiple | 126 |
| Linear plug and stem | 127 |
| Lip seal | 128 |
| ‘O’ ring seal | 130 |
| Diaphragm seal | 131 |
| Bellows seal | 131 |
| Steam trace seal | 131 |
| Mixproof | |
| Linear plug and stem | 133 |
| Butterfly | 135 |
| Diaphragm | |
| Onloff | 136 |
| Diversion | 138 |
| Membrane | |
| Onloff | 139 |
| Diversion | 140 |
| Tank outlet | |
| Rising stem | 141 |
| Falling stem | 142 |
| Pressure relief | |
| 2 port | 143 |
| 4 port | 145 |
| Back pressure | |
| Membrane | 146 |
| Diaphragm | 147 |
| Flow control | 148 |
| Non-return | 149 |
| Bibliography | 150 |

CHAPTER 7 PUMPS

| | |
|-----------------------|-----|
| Introduction | 151 |
| Centrifugal | 152 |
| Positive displacement | |
| Rotary Lobe | 158 |
| Gear | 167 |
| Flexible impeller | 168 |
| Vane | 169 |
| Flexible liner | 170 |
| Progressing cavity | 171 |
| Peristaltic | 173 |
| Plunger | 175 |
| Flat diaphragm | 177 |
| Double diaphragm | 179 |
| Tubular diaphragm | 180 |
| Drainage | 181 |
| Bibliography | 183 |

CHAPTER 8 CLEANING IN PLACE

| | |
|----------------------------------|-----|
| Introduction | 184 |
| Safety breaks | 186 |
| Type of cleaning unit | |
| Single use | 187 |
| Single use with limited recovery | 188 |
| Single use operation | 189 |
| Re-use | 191 |
| Multi-use | 192 |
| Decentralised re-use | 193 |
| Control | 195 |
| Conclusion | 195 |
| References | 196 |
