Contents

Present status and trends in innovations in packaging for food, beverages and other fast-moving consumer goods
N Farmer, Consultant, UK
- Introduction
- Light-weighting, material reductions, recycling and waste initiatives
- Flexible packaging market
- Active and intelligent packaging
- Bioplastics packaging market
- Recycled PET market developments
- High performance barrier additives, materials and coatings
- Current status of the market for glass containers, plastics containers and metal packaging
- Innovations in paper and paperboard packaging
- Holographic images
- Nanotechnology
- Consumer technologies, online retailing and social networking
- References

Modified atmosphere packaging and other active packaging systems for food, beverages and other fast-moving consumer goods
A Emblem, London College of Fashion, UK
- Introduction
- Development of modified atmosphere packaging
- Principles and applications of modified atmosphere packaging
- Choosing the packaging materials and formats
- Packaging operations and quality aspects
- Future trends
- Sources of further information
- References

Augmenting and securing the consumer brand experience through smart and intelligent packaging for food, beverages and other fast-moving consumer goods
J Plimmer, Product & Image Security Foundation, UK
- Introduction
- Integrating ‘intelligence’ into labels and packaging
- Intelligent packaging: integration with cell phones, camera phones and smart phones
- Smart labels and their uses in authentication and in reporting on product safety
- Conclusions
- References

Developments in plastic materials and recycling systems for packaging food, beverages and other fast-moving consumer goods
T A Cooper, ARGO Group International, USA
- Introduction
- Major types of petrochemical-based plastic materials used for packaging food, beverages and other fast-moving consumer goods
- Polyethylene
- Polypropylene (PP)
- Polystyrene (PS)
- Polysters
- Polycarbonate (PC)
- Polyamides (Nylons)
- Polyvinyl chloride (PVC)
- Ethylene-vinyl acetate copolymers (EVA)
- Ionomers
- Polyvinyl alcohol (PVOH)
- Barrier polymers and technology
- Scavenger systems
Developments in bioplastic materials for packaging food, beverages and other fast-moving consumer goods

T A Cooper, ARGO Group International, USA

- Introduction
- Definition and rationale for bioplastics
- Classification of bioplastics
- Biodegradability, compostability and anaerobic digestibility
- Major types of biodegradable and compostable plastics used in packaging
- Biodegradable plastics processing
- Major packaging uses for biodegradable and compostable plastics
- Biobased plastics
- Biobased polymers for packaging
- Examples of adoption of biobased materials in packaging markets
- Major concerns with biobased plastics
- Sources of further information
- References

Innovations and trends in metal packaging for food, beverages and other fast-moving consumer goods

- Introduction
- Manufacturing technology developments
- Developments in protection and decoration
- New product developments
- Future trends
- Conclusions
- References

Paper and paperboard innovations and developments for the packaging of food, beverages and other fast-moving consumer goods

R Coles, RichColes Packaging Associates, UK

- Introduction
- Package design optimisation
- Brand communication through packaging
- Consumer wellbeing, package integrity, brand authenticity and ecological packaging
- Other innovations in paper and paperboard packaging
- Sources of further information
- References

International environmental and sustainability regulatory and legislative frameworks for the packaging of food, beverages and other fast-moving consumer goods

G R Inns, PEC Partnership Limited, UK

- Introduction
- The environmental and sustainability regulatory and legislative framework in Europe
- The environmental and sustainability regulatory and legislative framework in North America
- The environmental and sustainability regulatory and legislative framework in the Asia-Pacific
Nanotechnology and the packaging of food and other fast-moving consumer goods
B Park, GBP Consulting Ltd, UK
- Introduction
- Regulatory status of nanotechnology
- Issues and concerns around nanotechnology
- Nano-enabled products of the future
- Future trends
- Conclusions
- References
Smart and interactive packaging developments for enhanced communication at the packaging/user interface
P Butler, Packaging Materials & Technologies, USA
- Introduction
- Smart packaging - enhanced communication directly via packaging
- Interactive packaging - enhanced communication via internet connectivity
- Future technology and societal trends affecting brand differentiation and consumer communication
- Conclusions
- References
The future: Global trends and analysis for the international packaging market in relation to the speed of impact of packaging innovation and likely material changes
N Farmer, Consultant, UK
- Introduction
- The consumer packaging market and the challenge of glass containers versus plastic containers
- The flexible packaging market
- Active and intelligent packaging developments
- An overview of the bioplastics market
- Biodegradable and compostable materials
- Recycled PET materials - the market over the next years
- International PET Developments
- The growth of recycling and utilisation of waste resources
- Metal packaging
- Paper and paperboard market
- Globalisation of business opportunities, innovations and world markets
- Conclusions: market trends and usage of major packaging materials to 2020
- References
