Contents

PART 1 INTRODUCTORY ISSUES

Definitions, regulations and health claims associated with dietary fibre and wholegrain foods

J W Van der Kamp, TNO, The Netherlands, and J Lupton, Texas A&M University, USA
- Introduction
- Defining dietary fibre and wholegrain
- Analysing the dietary fibre and wholegrain content of food
- Labelling
- Recommendations and guidelines for dietary fibre and wholegrain intake
- Health claims for dietary fibre and wholegrain
- References

Dietary fibre analysis in foods

B V McCleary, A Draga, and Naomi Sloane, Megazyme International Ireland Limited, Ireland
- Introduction
- An integrated procedure for the measurement of total dietary fibre, including resistant starch and non-digestible oligosaccharides
- Updates of the original integrated total dietary fibre procedure
- Interlaboratory evaluation of integrated total dietary fibre procedures
- Progress in acceptance of dietary fibre methodology by codex alimentarius
- References

Health aspects of dietary fibre

J Slavin, University of Minnesota, USA
- Introduction
- Fibre: definitions, measurement and intake
- Characterization and digestive impact of fibre
- Dietary fibre (DF) and disease
- Fibre and obesity
- Dietary fibre (DF) and microbiota
- Future trends
- Sources of further information and advice
- References

Wholegrain foods and health

J Lappi, H Mykkänen and M Kolehmainen, University of Eastern Finland, Finland, and K Poutanen, VTT Biotekniikka, Finland
- Introduction
- Epidemiological studies
- Human interventions
- Food factors important for the health effects of whole grain foods
- Conclusion and future trends
- References

The range of fibre dietary ingredients and a comparison of their technical functionality

S W Cui, Ying, Wu and H Ding, Agriculture and Agri-food Canada, Canada
- Introduction
- Technical functionalities of dietary fibre ingredients
- Insoluble dietary fibre ingredients
- Soluble high molecular weight dietary fibre ingredients
- Soluble low molecular weight dietary fibre ingredients
- Resistant starch
- Conclusion
- References
Consumption and consumer challenges of wholegrain foods
K W Dammann, Cargill, Incorporated, USA, D Hauge, Grains for Health Foundation, USA, R A Rosen, Independent Consultant, USA, N Schroeder, Johns Hopkins University, USA, and L Marquart, Grains for Health Foundation and University of Minnesota, USA

- Introduction
- Whole grain and fiber consumption
- Wholegrain foods and consumer challenges: internal (personal) factors
- Wholegrain foods and consumer challenges: external factors
- Approaches to introducing whole grain foods
- Future trends
- Sources of further information and advice
- References

PART 2 DIETARY FIBRE SOURCES

Improving the content and composition of dietary fibre in wheat
P R Shewry, Rothamsted Research, UK, and University of Reading, UK

- Introduction
- Fibre content and composition of wheat fractions
- Specific effects of agronomy and environment on arabinoxylan (AX) and β-glucan content and composition
- Heritability and genetic analysis of arabinoxylan (AX) and β-glucan content
- Exploitation of genetic variation in grain dietary fibre in plant breeding
- Conclusion
- Acknowledgements
- References

Non-wheat cereal dietary fibre ingredients
J Sibakov, P Lehtinen and K Poutanen, VTT Technical Research Centre of Finland, Finland

- Introduction
- Cereal cell walls as dietary fibre
- Cereal bran production technology
- Technologies to improve the properties of cereal brans as source of dietary fibre
- Food applications of cereal fibre ingredients
- Conclusion and future trends
- References

Vegetable, fruit and potato fibres
M Nyman and L Haskå, Lund University, Sweden

- Introduction
- Fruits and vegetables as source of dietary fibre
- Effects of processing on fruit and vegetable dietary fibre
- Conclusion
- References

PART 3 IMPROVING THE QUALITY OF FIBRE-RICH AND WHOLEGRAIN FOODS: CEREAL PRODUCTS

Fibre-enriched and wholegrain breads
A Rakha, P Aman and R Andersson, Swedish University of Agricultural Sciences, Sweden

- Introduction
- Fibre enrichment of breads
- Processing
- Properties of dietary fibre enriched dough and breads
- Conclusion
- References
Performance of resistant starches in baking: a case study on fibre-rich and wholegrain muffins
A Salvador and S Fiszman, Instituto de Agroquímica y Tecnología de Alimentos (CSIC), Spain
- Introduction
- Muffin batter
- Muffin properties
- Sensory shelf life of muffins
- Sensory characteristics of muffins
- Conclusion
- Acknowledgements
- References

Fibre in extruded products
N Sozer and K Poutanen, VTT Technical Research Centre of Finland, Finland
- Introduction
- Extrusion cooking
- Effects of dietary fibre (DF) on the extrusion process and product quality
- Effects of extrusion on dietary fibre properties
- Conclusion and future trends
- References

Fibre-enriched and wholewheat pasta
C S Brennan, Lincoln University, New Zealand
- Introduction
- Process variables affecting pasta production
- Enrichment of pasta with whole grains or dietary fibre
- Relationship between ingredient selection, processing and nutrition
- Conclusion and future trends
- References

Fiber-enriched and wholewheat noodles
A S Ross, Oregon State University, USA
- Introduction
- Noodle quality attributes
- Whole-wheat noodles
- Fiber-enriched wheat-flour noodles
- Wheat-flour noodles and resistant starch
- Whole-grain and fiber-enriched noodles from other botanical sources
- Conclusion
- References

PART 4 IMPROVING THE QUALITY OF FIBRE-ENRICHED FOODS: OTHER PRODUCTS

Fibre-enriched dairy products
H D Goff, University of Guelph, Canada
- Introduction
- Dairy product categories and formulations
- Challenges of fibre enrichment
- Potential dietary fibre supplements for dairy products
- Potential product applications
- Future trends
- References

Fibre-enriched meat products
F Jiménez-Colmenero and G Delgado-Pando, Instituto de Ciencia y Tecnología de Alimentos y Nutrición (ICTAN-CSIC) (Formerly Instituto del Frio), Spain
- Introduction
- Strategies for the development of healthier meat products
- Fibre as an ingredient in meat product formulation
- Dietary fibre in meat products
- Future trends
- Acknowledgements
- References

Fibre-enriched seafood
A J Borderías and M Pérez-Mateos, Instituto de Ciencia y Tecnología de Alimentos y Nutrición (ICTAN-CSIC) (Formerly Instituto del Frio), Spain, and I Sánchez-Alonso, Instituto de Estructura de la Materia (IEM-CSIC), Spain
- Introduction
- Fortification with dietary fibres of aquatic origin
- Fortification with dietary fibres of terrestrial origin
- Conclusion
- Future trends
- Sources of further information and advice
- Acknowledgements
- References

Fibre-enriched beverages
L Viscione, Dupont Nutrition and Health (formerly Danisco UK Ltd), UK
- Introduction
- Adding fibres into drinks
- Types of fibres suitable for fortifying non-dairy drinks: gums and beta-glucans
- Types of fibres suitable for fortifying non-dairy drinks: fructans and glucose products
- Typical beverage formulations containing fibre
- Troubleshooting
- Future trends
- References

Fibre-enriched snack foods
V Stojceska, The Manchester Metropolitan University, UK
- Introduction
- Extrusion processing of ready-to-eat snacks
- Nutritional benefits of extruded whole grains
- Cereal by-products as a new source of dietary fibre
- Improving the quality of extruded products
- Conclusion
- Future trends
- References

Companion animal nutrition as affected by dietary fiber inclusion
M C Rossoni Serão and G C Fahey Jr, University of Illinois, USA
- Introduction
- Effects of dietary fibre on food intake and gastric and small intestinal function in companion animals
- Effects of dietary fibre on intestinal function of companion animals
- Clinical significance of dietary fibres in companion animal diets
- Strategies for incorporating fibre into companion animal diets
- Conclusion
- References

Soluble and insoluble fibre in infant nutrition
G Boehm, Milupa, Germany
- Introduction
- Non-digestible carbohydrates in human milk
- Soluble non-digestive carbohydrates of non human milk origin
- Insoluble non-digestive carbohydrates
- Conclusion
- References
