FOOD SAFETY INNOVATION AWARD
2022
★★★★★

Always alongside our customers to provide smarter and more dynamic Risk Assessment in Food Safety and Quality Control, moving from Test results to Actionable Insights, to help them ultimately provide Consumers safe products of the highest quality.

Our suite of solutions is based on rigorous science, technology, expertise, data science and an innovative spirit.

Augmented Diagnostics gives you a new way of looking at your production facility, using customized analysis tools that distill a mountain of data into real-time insights. This allows you to identify the source of the problem and execute solutions to prevent future incidents.

Our suite of solutions integrates core lab and at-line microbiology tools with data science, sequencing applications, and predictive modeling to data-mine the microbiome of your facility and products. This precise, data driven approach enables food quality and safety teams to move from detecting and responding to situations to predicting and preventing contamination, reducing hold-times, and avoiding catastrophic recalls.

It's a new way of improving food quality, safety, transparency, and company profitability.
