

GENE-UP[®] Real-time pcr solution for pathogen detection

Bringing confidence to the table

GENE-UP®

The real-time PCR pathogen detection system from the microbiology experts at bioMérieux.

To protect your customers, your company, and your reputation, you need a fast, simple, and accurate method for detecting pathogens.

GENE-UP[®] is an easy way to get rapid, reliable results when diagnosing food-borne pathogens.

productivity1. With GENE-UP®, limited training is required, cross-contamination risks are decreased, and rapid results speed up the decision process — improving overall manufacturing efficiency.

workflow.

PREPARATION

Increase efficiency and standardize performance with culture media preparation, automated weighing, diluting, and blending.

MASTERCLAVE®

- Approved by culture media manufacturers for more than 35 years
- Enhance your lab's workflow and productivity • Easy & flexible - the high
- quality solution for every lab

DILUMAT™ START AND DILUMAT™ EXPERT EVO

- New generation of precision sample dilutors improves workflow
- . Speed up sample prep and reduce contamination risk
- Save time and increase the efficiency of your lab

SMASHER[™] AND SMASHER XL[™]

- Large capacity
- patented "Smash" effect

- Real-time PCR analysis coupled with end-point melt peak analysis
- High level of specificity

• Duplex Norovirus GI & GII

• Hepatitis A

• Hepatitis E

STEC-STX & EAE

- Listeria spp.
- E. coli 0157:H7
- STEC-TOP 6
- Cronobacter spp
- Norovirus GII

- Listeria monocytgenes

Confidence comes from a simplified

Simplifying workflow with easy-to-use pathogen detection systems can improve overall lab

STREAMLINE SAMPLE AND MEDIA

blender/homogenizer utilizes • Efficient blending up to 4 liters

GENE-UP®

The real-time PCR pathogen detection system from the microbiology experts at bioMérieux.

To protect your customers, your company, and your reputation, you need a fast, simple, and accurate method for detecting pathogens.

GENE-UP[®] is an easy way to get rapid, reliable results when diagnosing food-borne pathogens.

GENE-UP® REAGENTS

GENE-UP® offers ready-to-use test kits for your most pressing food safety concerns. The simple workflow is the same with each test, minimizing training and improving efficiencies.

Norovirus GII

• Hepatitis A

Hepatitis E

• Duplex Norovirus GI & GII

CURRENT TEST KITS INCLUDE Norovirus GI

- Salmonella • STEC-STX & EAE
- Listeria spp.
- E. coli 0157:H7
- Listeria monocytgenes
- STEC-TOP 6
- Cronobacter spp

And GENE-UP's® reporting software gives you exactly that: fast, accurate answers. It improves manufacturing efficiencies and speeds up the decision-making process.

you can trust

With GENE-UP®, it's mo results. It's assurance **GENE-UP®** provides 3 le by using both real time curve and melt analysis positive or negative res

The EHEC Kit combines stx and eae, and the top 6 serogroups in one solution. And, using GENE-UP[®] in combination with VIDAS[®], the EHEC solution provides unrivaled specificity.

GENE-UP®

Providing your clients with fast, accurate answers is good for everyone.

 Remote, web-based software allows for immediate access to results when a run is complete. • Real-time desktop reporting allows you to react quickly.

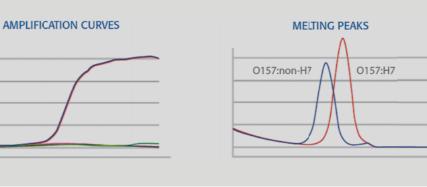

Confidence comes from results

ore than just	
in the results.	
evels of specificity	
e amplification	
s to determine	
sults for a sample.	

Three Levels of Specificity: → Primers →FRET probes →Melt Peak Melt Peak analysis offers an additional level of sensitivity valuable for detecting low level samples

Efficiency and reliability with the EHEC solution

- Simplifies the testing protocol
- Potentially reduces the number of false positive results

Confidence comes from unparalleled simplicity, superior performance and maximum flexibility.

RAPID

- Speed up the Decision Process
- Decrease Storage Cost
- Increase Productivity¹

SIMPLE

- Facilitate Laboratory **Organization & Workflow**
- Streamlined Training Process

RELIABLE

EÖ

Decrease Cross Contamination Risk

Reduce Product Waste

FLEXIBLE

- No Need to Work in Batches
- Manage Peaks of Activity
- Testing Alternatives: Virus Testing with ceeramTOOLS®

Confidence comes from a proven, reliable partner.

With GENE-UP®, you're not just getting an intuitive real-time PCR solution for pathogen detection, you're getting 50 years of microbiology leadership from a vigilant team that embraces the highest standards in microbiology safety. As a bioMérieux customer you can expect:

→ Dedicated customer support and Scientific Affairs teams

→ Access to VILINK[®], a highly secure direct connection between bioMérieux technical support and your instrument that provide real-time instrument system monitoring and rapid, secure online assistance to optimize instrument efficiency and keep your laboratory running smoothly.

→ LIMS connectivity for easy uploading and downloading of sample information and results.
