

Come and join us on our Graduate Program!

You could be part of innovation, research, & technology that guides the global Food and Drink industry.

We pride ourselves on being the go-to science-led & industry-steered partner for many of the world's biggest brands. With over 100 years of expertise, we help relieve current pressures & prepare our members for what is to come.

We offer training, support, and career progression

We're passionate about harnessing & encouraging new talent into our business and the industry! Are you an engaged & passionate future scientist, who is eager to start 'Your Campden BRI Journey' in Sept '22?

Your future with us

We offer a flexible graduate programme, supporting you with a preferred focus, allowing you to gain experience, brilliant insight, variety, & knowledge development:

- Analytical Chemistry, Microbiology, or Food Technology focus
- Dedicated senior mentor to guide & support you
- 4x 6-month rotations within your specialist area or across the business functions
- On the job learning in ISO & UKAS accredited labs
- Technical Talent Academy ensuring you cover all relevant training modules
- The opportunity to work on a 'business project' as the 2022 Graduate Program Team

We also give a great grounding in the overall business with short secondments to operating units & commercial areas- to ensure you get the most knowledge and insight possible.

Are you ready to start your Campden BRI Journey?

If you are a dedicated graduate with a minimum 2:1 degree in science (or similar) in Analytical Chemistry, Microbiology, or Food Science/Technology, with experience of using your initiative and the ability to take responsibility (evidenced by volunteering, extracurricular activities, work) send your CV and covering letter to Recruitment@campdenbri.co.uk.

The closing date for reviewing applications is 4th February 2022.
