Web site address: <http://www.campdenbri.co.uk>

Campden BRI helps food and drink businesses to succeed: we provide scientific, technical and regulatory support to the food, drinks and allied industries worldwide. The practical application of technical excellence lies at the heart of all that we do and is supported by our industry-leading facilities, expertise and knowledge.

All our activities are built on an extensive programme of research and innovation steered by industry to ensure maximum commercial relevance.

We provide services to companies all along the supply chain. Many of our clients are major blue chip companies and household names. We are membership-based, and for companies that come into membership we offer discounts, access to expert advice and other exclusive benefits.

Locations

The Campden BRI Group operates from three sites in the UK and a fourth in Hungary. The role as advertised will be based at the Chipping Campden site (Gloucestershire, UK) but will, from time-to-time, require travel to other Group sites.

The site in Chipping Campden has over 300 full or part-time staff. A further 50 staff are employed at the site at Nutfield (Surrey) and 20 at our site in Budapest (Hungary). Our site at Leamington Spa (UK) is a dedicated consumer test centre.

You and us

We are an enthusiastic, friendly, supportive and multi-disciplinary team of eleven. Our aspiration is to make the Marketing and Communications Department a really great place to work. We are looking for a team member who will embrace this ethos.

Attitude, aptitude and appetite are more important than experience – though you'll need to be able to show that you can write well and vary your style. A background in science or technology is also essential – a lot of the content will be technical. But we will invest time in developing the right person who can demonstrate potential.

You'll get to work as part of a team that strives to be purposeful, pragmatic and supportive. You'll get clear goals linked to the departmental and business plans. You'll share some objectives with other team members – bringing complementary strengths to projects and campaigns.

You'll own, shape and pursue your personal development plan. You'll discover your strengths and how to play to them. You'll be expected to learn from other team members and share your knowledge and skills with them. You'll get to understand their roles and help them understand yours. You'll get variety.

As a department, we are responsible for promoting and communicating our science and technology to members as well as other existing and potential clients. We do this through a range of communications channels and activities including:

- the development and maintenance of the corporate and other websites and related electronic communications
- design and production of newsletters, brochures, leaflets, posters and related materials
- production of audio and video content
- management of the company's social media presence
- campaigns to promote designated aspects of our services and research activities
- coordination of the work of our Member Interest Groups (MIGs)

- provision of an in-house, centralised digital print facility
- management of specialist suppliers such as PR, marketing and communications agencies
- handling of media enquiries.

We also play a significant role in internal communications in the business - promoting awareness of business and other developments – for example, through our intranet i-comm.

We see continuing professional development as essential to the success of the team and the business. We are keen to encourage and support all team members in developing their strengths and fulfilling their potential.

Role - Duties and responsibilities – see Job Description

Qualifications, skills and experience – see Job Description
